

Nellie Edge Online Seminar Resources:

How to Print Your Enlarged Posters

POSTER PRINTING - locally

The posters are set up to print at 100% size (22" x 28").

You can send the pdf files to your local office supply store such as — FedEx Office — or district printing office. They can often mount on foam core or poster board and laminate (for an additional charge).

ONLINE PRINTING

Another cost-effective approach: Send the pdf to an online printer.

We use Overnight Prints: <http://www.overnightprints.com/posters>

Posters run approximately \$5 each (plus \$6.75 shipping). Use their live chat or call their customer service for uploading assistance.

Meanwhile, buy foam core or poster board for mounting from your local office supply store.

TIP: Use "YES! Paste" to mount posters for durability (it does not cause ripples). Check online for good prices.

DO IT YOURSELF AND SAVE

You may also create your own enlarged 22"x28" heart word posters (pink, purple, yellow, and green) by purchasing colored railroad/poster board. Add an enlarged heart, also from poster board, and glue on the large word cards included in your Heart Word Resource set (Online Seminar #3). Laminate for durability!

Make our best practices routine in your classroom: Visible Learning with language charts accelerates literacy!
